## Report of Chief of Police

To the Honorable Board of Selectmen:

I am submitting my report for the year ending Dec. 31, 1923.

First I want to express my appreciation for the support of the selectmen and the citizens in the year just passed, also to the loyalty of the officers under my charge.

We had a very remarkable season, not a serious accident, nor a drowning until unfortunately one did occur after the season had closed.

There was not a case of pocket picking, nor any confidence games reported during the season, and considering the crowds we had it is a remarkable showing.

At the request of several prominent citizens I employed a motor cycle officer for six weeks or so to look after speeders, as a result speeding on our streets was practically eliminated. I also employed an extra man to be on duty from twelve midnight until eight a. m., so there was somebody on duty all the time. I found this worked out very satisfactory.

The Life Guards were picked men, all graduates of the Red Cross Life Saving Division and they did excellent work. I would recommend that a larger sum be appropriated this year. Some action has got to be taken in regard to the traffic problem. It is increasing so rapidly that we will not be able to care for it soon; the town is fast outgrowing its facilities for caring for the cars that come here and want to park. Hundreds went to other places last season for that very reason. Our season commences early in May with good weather, and every evening and Sundays there are so many cars that it requires the services of extra officers to look after them, which increases the expenditures of the department.

I would recommend the purchase of a car for the use of the department. It costs the town quite a sum for hire, and in a short time it would pay for itself.

Whole number arrests	141
Intoxications	53
Driving while intoxicated	8
Driving without license	1
Vagrancy	39
Speeding	14
Assault	4
Larceny	8
Gambling	3
Evading fare	1
Illegal possession	5
Disorderly conduct	1
Peddling without license	2
Creating disturbance	1
Search for stolen goods	1

Respectfully submitted,  
LEWIS M. FOWLER,  
Chief of Police.

# Report of Chief Engineer of Fire Department.

---

To the Citizens of Old Orchard:

Your department responded to twenty-two calls during the fiscal year, most of them grass or chimney fires, which resulted in very little or no damage.

Principal fires—Fire at Jewett Hen House, total loss of building and contents. Fire at Town Hall, roof, loss \$75. Fire at Duffy Block, total loss of building and contents. Valuable help was rendered at this fire by Biddeford and Saco and Portland departments; with their aid the fire was held at block where the fire started. Fire at Frank Fogg bungalow, total loss. The Combination Truck was sent on four occasions to fires outside the fire district to render whatever assistance it could under the circumstances. The company did good work on every call. Having a man at fire station permanently and one or two during the summer season has worked to the town's advantage and I would recommend that it be continued. Would recommend the purchase of 1000 feet of hose.

Through the help of a subscription taken during the summer, a Ford Chassis was purchased for use as a Ladder Truck; a balance of \$112 remains to be paid on the apparatus, and we would ask for an appropriation to cover this amount. With our present fire equipment and added quarters, we are in excellent condition.

Respectfully submitted,

THEODORE H. MINGO, Chief

# Library Report

---

To the Citizens of Old Orchard:

The Trustees of the Free Public Library present herewith the several reports of its officers for the fiscal year.

The Trustees have earnestly discussed ways and means, endeavoring to find some way that would give added room, which is so much needed for the library. You will see by the Librarian's report that over two hundred and fifty books have been added during the year, and unless more room can be obtained in some way the capacity will soon be filled.

A new and up-to-date dictionary, also a new atlas have been purchased during the year, and a set of books comprising three large volumes covering the late World War have been added and effort has been made to cooperate with the schools as far as possible, giving the students opportunity to obtain for a few days at a time all reference books that would be helpful in their work.

The Trustees would gladly welcome any suggestion, also would be pleased to receive names of books desired by the citizens of the town.

Respectfully submitted,

C. R. L. SNOW,

B. M. WHITMAN,

MRS. KATE L. LUCE,

Trustees.

## LIBRARIAN'S REPORT

# School Report.

---

To the Citizens of Old Orchard:

The present inadequate housing of our school children is recognized as the major school problem of Old Orchard. To this problem it seems best to devote practically the entire present report. That this problem is recognized by the people of the town is evident from the proposals for the solution of it during the past year. This recognition is a most hopeful development, for whatever may be the difference of opinion regarding the best solution of the difficulty, with a live, thoughtful interest, the result, satisfactory to those most concerned, is bound to follow speedily.

It is equally gratifying to note that all are eager to formulate a complete and adequate program to meet future as well as present needs of the town. In organizing such a plan the ideas of the investigating committee, board of education, state educational department and other interested groups of citizens will have a part. Obviously, this report will embody the ideals of the board of education and the superintendent,—ideals which they feel are easily within our reach.

As frequently stated before in these reports, Old Orchard is so situated that it may have the highest type of school system with a minimum of expense. The consolidated school—,which is recognized as the best type—is the natural school for Old Orchard. The vexing transportation problem is eliminated because of splendid car service by which pupils may be carried to and from school at pre-war prices.

Thus the only question left to be solved is “What kind of education will you furnish to your boys and girls in that consolidated school?” and at present the answer is based

on the other question, "What kind of school building will it be and what will be its surroundings?"

It is evident that the satisfactory building must:

- 1 Provide housing facilities for the probable number of children who will come into the school system;
- 2 Provide for proper distribution of those pupils according to grade or subject;
- 3 Provide proper facilities for the teaching of those grades or subjects along the lines which educational authorities in their increasing wisdom believe to be the best for our boys and girls.

#### PROBABLE INCREASE IN NUMBER OF PUPILS.

In the past ten years, the gain in the school census, i. e. the number of people in Old Orchard of ages from 5 years to 20 inclusive, has been about 40 per cent.

The number of pupils actually enrolled in school in the fall term 1923 was 274. Taking this figure as a base and considering a probable increase of 40 per cent. in the next ten years, this means that within that time the town must provide for approximately 384 pupils.

This is almost too conservative an estimate, for the following reasons:

- 1 It is recognized that the actual number of pupils attending school is growing more rapidly than the school census. In other words, more and more of those who ought to go to school are going as the educational system improves and the need of school education is becoming better realized. For instance, in the fall of 1916, the actual enrollment in our schools was 152; in the fall of 1923, seven years later, the enrollment was 274. The increase was 80 per cent. as compared with an increase in the school census of 40 per cent.

- 2 As the efforts to bring more permanent residents to Old Orchard go on, the per cent. of increase in school

population, i. e. school census, will be greater in the next ten years than it has been in the past.

3 As the educational system is improved by better facilities, more of the summer residents will stay longer since they will feel that they can place their children in satisfactory schools while they remain in town.

#### PROPER DISTRIBUTION OF PUPILS.

By proper distribution of pupils is meant merely the proper seating for the pupils without regard to facilities for education in different subjects which will be discussed under "Proper Educational Facilities."

To provide for proper distribution of pupils in Grades 1 through 6, allowing for merely an increase of 40 per cent., eight rooms must be provided. This will mean that for each of the six grades, a single room will be provided and that two additional rooms will be provided for overflow from those grades in which the enrollment is too great for one room. That this overflow provision is the minimum which can be accepted, is evident from present conditions. For instance, in the fall enrollment 1923, for grades 3 and 4, the enrollment was 34 pupils each. With an increase of 40 per cent., these grades would have 48 pupils each. Obviously this would necessitate the use of at least one overflow room in which the extra pupils from both grades would be taught. Even then it should be realized that the combining of two grades in one room is far from satisfactory.

Thus, any new plan should provide for eight rooms for grades 1 through 6. For grades 7 through 12, three home rooms, providing for about 40 pupils each, would probably take care of the actual seating of the pupils. One of these rooms would provide for the senior high school. The other two, which might well be connected, would be the rooms of the junior high school.

Thus, any new plan should provide for eleven "home rooms," i. e. rooms where the pupils might have regular seats.

### PROPER EDUCATIONAL FACILITIES.

Old Orchard is indeed fortunate in its consolidated school plant in that rooms for special uses, i. e. rooms other than "home rooms" may be used by the entire organization from grade 1 to grade 12. This makes it easier for your board of education to carry out its ideals of having every room in the plant in use as nearly 100 per cent of the time as possible.

However, it is equally evident that rooms specially located and fitted should be provided for certain courses and activities which are necessary in any modern system of education.

These should be as follows:

One auditorium.

One gymnasium.

These are a necessary part of any system of education and are also valuable for community use outside of school hours.

Two science rooms,—one for the junior science group and one for the senior group.

Two domestic science rooms—one for sewing equipped with tables and chairs and one for cooking, equipped with proper apparatus and utensils.

One manual training room for boys.

One commercial room, with typewriting room adjoining and connected by glass doors.

One library.

One room for health and general community activities.

As pointed out, all of these rooms would be used by the entire school whenever a group was engaged in the activity for which the room was planned. Each room, incidentally, should be planned specifically for its activity. It should be

noted that to insure more nearly 100 per cent. use of these rooms, no special class rooms have been provided for the so-called book subjects. These subjects such as English, history, etc, when they cannot be scheduled for the home rooms can be taught in these special rooms when they are not scheduled for their special use. English and like subjects can be very satisfactorily taught in a science or sewing room, but science and sewing cannot be satisfactorily taught in a room which is not planned for that special subject.

In addition to the actual teaching rooms as listed, of course the school should provide for proper administration rooms, such as the principal's office, also proper sanitary arrangements and provision of adequate space for storage, for eating lunches, etc.

In order to provide properly for the safety of the children as well as the reduction of fire hazard to the town of Old Orchard, a fire proof building is strongly recommended.

The school grounds should provide proper space for athletics and play. The school is the logical center of the playground. The close relation between the gymnasium and the athletic fields, particularly in allowing for the physical activity in the open in proper weather is evident. This recommendation does not suppose a monumental field for athletics, but rather a proper place, for instance, for several short baseball diamonds, rather than for one regulation diamond.

#### SUMMARY OF PROPER TYPE OF SCHOOL PLANT

Thus, a school plant which will provide for future as well as present needs will include eleven home rooms to adequately seat the pupils, ten class or special rooms to adequately teach the pupils, adequate administration, sanitation, and storage space. Around this building will be arranged proper play facilities. The whole plant should be so arranged as to allow the greatest possible use outside of school hours.

### THREE POSSIBLE PLANS OF DEVELOPMENT

Three possible solutions of our problems have been under consideration of your board of education and discussed in general by interested citizens.

1 The first is the purchase of a new lot of at least five acres and the erection thereon of a building which will meet the needs outlined above. It is always easier and more satisfactory to plan and build any plant without the necessity of unplanning or unbuilding any existing, antiquated plant. Such a proposal would allow the use of the present plant without interruption of work while the new was being constructed. Such a plan would allow for adequate school surroundings and for further expansion, if in distant years it should become necessary.

Your board of education feels that this is the ideal plan but recognizes clearly that quite serious difficulties lie in the path of its achievement.

2 Another proposal, being given serious consideration, is to remodel and extend the present building, obtaining the best plant possible under the circumstances. An analysis of the needs seems to your board to indicate that such a plan, although it undoubtedly has considerable merit, would provide merely a temporary and at that rather unsatisfactory solution of our problems.

3 A proposal between these two has received favorable consideration from your board of education. This would be to add to the present school lot the adjacent property extending the lot to Summit street, and providing a lot 250 by 200. On the proper part of the lot, a new building could be erected, providing adequate facilities. Such construction could go on without stopping, although by noise and the spreading of materials over the lot, it might somewhat handicap the instruction given in the present buildings.

To this proposal, if the ideal of an entirely new site is deemed inadvisable by the town, your board of education respectfully invites careful consideration.

### THE FIRST STEPS

It is probably true that financial difficulties prevent the realization of this aim at once or in one step. Therefore, your board of education recommends the following as immediate steps.

1 Purchase of the proposed extension of the present school lot. This could probably be done from current taxes. An addition of \$10,000 to the proposed school expenses for the coming year would probably not cause a school tax rate of more than .008 which is low as compared with the rest of the state. In 1912-22, the average school tax rate in the state was .0108.

2 Drawing of the general ground plan for a complete school plant meeting all of the needs outlined above. Such a plan might contemplate the arrangement of the building in three parts. On one side it would have the elementary school building; on the other, the junior-senior high school building; in the center, connecting the two, but available for independent use for community functions, the gymnasium and auditorium building.

3 Erection of the eight room elementary school building in such a place that the other two parts of the plant could be erected and joined to it at a later date. The cost of the erection of this elementary school building would necessarily be met by a bond issue.

The work of the schools during the past year has been a cause of considerable gratification. Not only has the academic work been high, but the social attitude developed between school and town has been particularly good. The lack of serious routine problems has not only given opportunity for the deeper and less interrupted consideration of the building problems, but it proved that our school pupils and teachers are worthy of better accommodations.

Perhaps the most serious obstacle to the best work in one field has been the necessity of having grades 3 and 4 and grades 5 and 6 in alternate sessions. This arrangement is

far from satisfactory. It is urged that funds be provided to furnish an extra teacher and to provide a room whereby this arrangement can be terminated.

The general run of school activities, including their achievements in various lines, have been placed before you in the press in a much more readable form than can be presented in a report. Reports which follow those most intimately connected with the school departments will also supplement this statement of school affairs.

The professional spirit of our most excellent corps of teachers is to be commended. They have a record of 100 per cent. membership in the National Educational Association and our town was the second in the state to report the same extent of membership in the Maine Teachers' Association.

Your superintendent also wishes to commend to the town the splendid devotion to the ideals of the best in education which they have shown during the past year. It has been a year which has called for more than the usual amount of work on the part of committee members and at no time have they been found unready to assume responsibilities, great and small, which their office has placed on them.

Respectfully submitted,

F. H. B. HEALD,  
Supt. of Schools.

## REPORT FOR 1923

To the Superintendent of Schools:

In this my seventh annual report I wish to state that we have had another very successful year. In making a review of the work, however, and in measuring the progress that has been made, I cannot help but feel that if your teachers had had better facilities to work with the progress would have been much greater and the results more gratifying.

Our registration this year was much larger than in any previous year. Several of these students were transfer students and are now attending high schools in the South. They will be transferred back to Old Orchard again in the spring term. From this we can see that our schools are endeavoring to meet the needs of our summer colony as well as those of our permanent population.

Our faculty has undergone some changes during the past year. While we miss both Mr. Clancy and Miss Hughes who were very efficient teachers, we were glad to welcome Miss Gertude Lombard, a graduate of Bates College, to take charge of English and Latin, and Miss Helen Williams of Colby College to take charge of our French department. She is also health director for our entire school system.

We have continued the same high type of scholastic standing. We again received the privilege granted by the New England College Entrance Certificate Board of sending students to college on certificate. Last fall three of the graduating class entered the University of Maine.

This year finds us with an even greater number of activities in our school life than previous years. The new organizations are an orchestra, Glee Club and a Health Club. Very efficient work is being done in each of these. Especially efficient is this work when we consider the conditions under which it is being carried on—namely lack of room and equipment. We also have in addition to these, our athletics, our school paper, and our public speaking pro-

gram. All of these call for a vast amount of outside work from both teachers and pupils. The results however, warrant this effort for it is only by having these various activities that we are able to produce all round students and to give the best foundation for future citizenship.

Our dental and medical examinations this year were very gratifying. They showed a large improvement over last year. With our Health Director and the very efficient follow up work which she is doing I am sure we have a very strong health program. In a letter received just recently from Miss Buck, the State Health Director, after she had been here and made an examination of our work she states that we have one of very best health programs in the state.

The reports from the various departments follow.

### DOMESTIC ARTS DEPARTMENT

What is more vital to the life of any community than properly and sanely managed homes? The Domestic Arts course at Old Orchard Junior-Senior High School is an attempt to give the girls the fundamental principles of Home making. To accomplish this purpose the following courses are offered:

Food, clothing:—7th and 8th grades.

Foods 1, Clothing 1, Household Appliances, Household Sanitation, Foods 11, Clothing 11, Household Accounting, Personal Hygiene and Home Nursing:—9th, 10th, 11th and 12th grades.

The value of such courses is far-reaching and essential to the development of every girl. These subject are not properly taught in the average home and therefore must become a part of the regular school program. The work as far as possible is of a practical nature, so that what is learned may be applied and used every day in the year.

Respectfully submitted,

MARIE B. BLACKMAN.

## LATIN AND ENGLISH DEPARTMENT

The School and the Community:—

We sometimes forget the importance of the school. The adults in any community are the products of the schools. What the schools are the individuals who study in those schools are: the ideas of graduates are as broad and their ideals as high as are the ideas and ideals of the school from which they come.

Before graduation, however, this group is a vital factor in the community. The spirit of fair play, sportsmanship, self-control, honor and co-operation as it is manifested in the various school activities, is felt throughout the town.

The enthusiasm in the town demonstrations and in community interests evidences the spirit of co-operation. We have organized basket ball teams which serve as examples of training in fair-play, true sportsmanship and the ability to work together. We have organized a school orchestra and a glee club which, in a lesser degree teach co-operation, self-control and ideals of serving for the best good.

The students are eager, impetuous, enthusiastic. By closer friendship and understanding with those who have already graduated, each year men and women will leave school more truly and better fitted for life.

Respectfully submitted,

GERTRUDE LOMBARD.

Again as in the past years we have received the same loyal support from you and your committee. We realize that it is only by having such support, for a foundation upon which to build, that we are able to accomplish the best for Old Orchard Junior-Senior High School. Please accept our sincere thanks.

Respectfully submitted,

FRANK H. JEWETT,

Principal.

### MUSIC REPORT.

To the Superintendent of Schools:

W. Otto Miessner, President of the Music Supervisors' National Conference says, "Music is one of the great constructive forces in Americanization and in the inculcation of universal brotherhood."

From the primary grades all the way through high school we are endeavoring to give the pupils careful training in both practical and artistic music development; technical work sufficient to enable them to read and interpret music according to their grade, and through the study of Music Appreciation become familiarized with some of the best known masters of music and their compositions.

We have general assembly singing in the high school one period each week; also the Glee Club for those who wish to take more advanced work in part singing and interpretation.

The school orchestra rehearses outside of school hours. These activities are under the direction of the Supervisor of Music, assisted by Miss Gertrude Lombard of the high school faculty, who is proving herself invaluable in the work.

Respectfully submitted,

HELEN M. DOLLY,

Supervisor of Music.

### HEALTH DIRECTOR.

To F. H. B. Heald,

Superintendent of Schools:

A great deal of work along health lines is being carried out in the first six grades through the medium of the modern Health Crusade movement. Last year, the third and fourth grades, under the direction of Mrs. Christy, won a national pennant. This was one of the four to be awarded in New England.

The health habits begun in the Modern Health Crusade

are continued in the junior and senior high schools, through the health clubs. In order to be members in good standing in these clubs, pupils have certain health duties to perform.

The school greatly appreciated the advent of a first-aid cabinet. It has already seen much service, especially after basket ball games.

The excellent habit of serving hot drinks at noon, to the grade children who bring their lunches, has been begun by Miss Blackman, in cooperation with Miss Fogg, Mrs. Nickles, Mrs. Christie and Mrs. Ethelynn Tucker. At the town hall the same plan is being carried out by Mrs. Marion Tucker.

The examination of the teeth by Dr. Brown shows marked improvement over last year. Although there were not as many perfect sets of teeth, there were many with only one or two cavities. Many children have received dental care since this examination.

Dr. Willard found an improvement in the general physical condition of the pupils.

Educators are realizing more and more, the advantages of preventive medicine. That is the object of physical and dental examinations and also of the health clubs. Then, through increased bodily health, there will naturally come about greater mental vigor.

Respectfully submitted,

HELEN WILLIAMS,

Health Director.

#### DOCTOR'S REPORT.

To Mr. F. H. B. Heald,  
Superintendent of Schools,  
Old Orchard, Maine:

I herewith submit my report on medical examinations in the public schools for 1923-24.

The percentage of defects is much less this year than last, and the percentage of those who showed defects last

year is greatly improved this season, the improvement being about 60 per cent.

There was a much smaller number of pupils with defects than ever before, which I think is largely due to the inspection.

Following is a list of the number of pupils examined and the number of defects found:

Number of pupils examined,	211
“ “ “ having skin diseases,	7
“ “ “ “ hypertrophied tonsils,	6
“ “ “ “ pediculi,	4

Respectfully submitted,

L. E. Willard, M. D.

#### REPORT OF SCHOOL DENTIST FOR YEAR 1923-24

Portland, Maine,

November 19, 1923.

To Mr. F. H. B. Heald, Supt. of Schools:—

I desire to tell you that I have this year found a very pronounced improvement in the condition of the mouths and teeth of the pupils of your schools.

To review: The first year I reported 3 pupils with perfect teeth. 171 examined.

The second year I reported 26 pupils with perfect teeth.—205 examined.

This year I now report 33 with perfect teeth. 213 examined.

But there is another factor to which I desire to call your attention.

There are this year 16 pupils with only one cavity in their teeth.

There are 21 pupils this year with 2 cavities in their teeth.

There are 86 pupils with 3 cavities in their teeth.

These 37 pupils show that they are giving their teeth good care. I believe these pupils are doing excellent men-

tal work and I know they are far better physically than they would be if they were not.

This year I examined 213 children with a total of 1010 cavities, making an average of 4 158-213 cavities.

To show you the reason for this high average.

There was	1	pupil with	20	cavities.	20
There were	2	pupils with	18	cavities	36

CECIL P. BROWN.

# Town Warrant

March 3, 1924

---

To Lewis M. Fowler, Constable of the Town of Old Orchard, in the County of York:

Greeting:—

In the name of the State of Maine, you are hereby required to notify and warn the inhabitants of said town of Old Orchard, qualified to vote in town affairs, to assemble at the Town Hall in said town, on Monday, the 3rd day of March, A. D. 1924, at 9 o'clock in the forenoon, then and there to act upon the following articles, to wit:

1st. To choose a moderator to preside at said meeting.

2nd. To choose all necessary town officers for the ensuing year.

3rd. To hear and act upon the reports of the town officers and all special and standing committees.

4th. To see what action the town will take in relation to pay of town officers.

5th. To see what sums of money the town will raise: 1st, for common schools; 2nd, for free high school; 3rd, for free text books; 4th, for making and repairing highways and bridges; 5th, for the support of poor; 6th, for the pay of town officers; 7th, maintaining street lights; 8th, for contingent expenses; 9th, for sanitary expenses; 10th, for town interest; 11th, for repairing school houses; 12th, for the public

library; 13th, for heating, lighting and care of town property; 14th, for moth nests; 15th, State road patrol; 16th, public toilet; 17th, school supplies; 18th, for transportation of high school scholars; 19th, for advertising; 20th, for payment of serial bonds.

6th. To see what sum of money the town will vote to raise to pay collector's commission and abatements.

7th. To see what compensation the town will vote to pay the collector for collecting taxes for all moneys actually collected.

8th. To see if the town will vote when the taxes shall be committed to the collector for collection and what rate of interest, if any, will be charged thereon, thereafter.

9th. To see if the town will authorize the Selectmen and Treasurer to hire money in anticipation of taxes.

10th. To see if the town will authorize the Selectmen and Treasurer to issue town notes to pay those, if any, which fall due the present year.

11th. To see if the town will authorize the Assessors to make such abatements as they think reasonable.

12th. To see what action the town will take and what sums of money the town will raise to maintain a police force; to construct and maintain sidewalks; to construct and maintain sewers and drains; to maintain fire department; to maintain town team; for hydrant rental; for interest on debt incurred in fire

department, sewers and loans, all within the limits set out in Section IV, of the act of incorporation of the town of Old Orchard, to be a separate tax, to be assessed and collected as provided in said act.

13th. To see if the town will vote "yes" or "no" on the question of appropriating and raising money necessary to entitle the town to State aid as provided in Section 20 of Chapter 130 of the Public Laws of 1913.

14th. To see if the town will raise and appropriate the sum of \$1,333.00 for the improvement of the section of State Aid Road as outlined in the report of the State Highway Commission, in addition to the amounts regularly raised for the care of ways, highways and bridges, the above amount being the maximum which the town is allowed to raise under the provisions of Section 19 of Chapter 130 of the Public Laws of 1913, or such other sum as is deemed necessary.

15th. To see if the town will vote to set apart the sum of \$1,000.00 from the regular appropriations for sidewalks and highways, for the purpose of maintaining and constructing highways and sidewalks in that part of Old Orchard known as Ocean Park, to be used by and under the direction of the Ocean Park local committee, Road Commissioner or Selectmen.

16th. To see if the town will vote to appropriate a sum of money sufficient to pay for the services of a school physician as required by Chapter 73, of the Public Laws of 1909.

17th. To see what sum the town will vote to appropriate for the purpose of cleaning beach during the summer season.

18th. To see if the town will vote to provide extra lighting on the sea wall during the summer months, and how much it will appropriate therefor.

19th. To see what action the town will take in regard to extra lighting of streets during the summer months and how much it will appropriate therefor.

20th. To see what streets or parts of streets the town will vote to lay dust during the summer months, the cost thereof to be assessed against the property thereon as now provided by law.

21st. To see what action the town will take and what sum of money, if any, the town will raise to maintain a winter patrolman.
