Area with Reduced Flood Risk due to Levee Area with Flood Risk due to Levee Zone D **Area of Undetermined Flood Hazard** *Zone D* and the LiMWA (or between the shoreline and the LiMWA for areas where VE Zones are not identified) will be similar to, but less severe than those in the VE Zone. STRUCTURES Levee, Dike, or Floodwall 18.2 Cross Sections with 1% Annual Chance 17.5 Water Surface Elevation

The AE Zone category has been divided by a Limit of Moderate Wave Action (LiMWA). The LiMWA represents the approximate landward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone

Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM Index. These may be ordered directly from the Flood Map Service Center at the number listed

For community and countywide map dates refer to the Flood Insurance Study Report for this jurisdiction.

To determine if flood insurance is available in this community, contact your Insurance agent or call the National

Basemap information shown on this FIRM provided in digital format by State of Maine, Maine office of GIS

The map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have

been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and FDTs

may reflect stream channel distances that differ from what is shown on the map.

Limit of Moderate Wave Action (LiMWA)

Many of these products can be ordered or obtained directly from the website.
