### **The Town Council is hosting a public workshop on the ongoing Marsh Resiliency Study.**

Objectives of the workshop:

The community will share their experiences with OOB's saltmarshes and learn about the benefits of healthy marsh ecosystems.

The community will learn about OOB's tide gate, the role it does (and doesn't) play in regulating the marsh, and how this project is developing a better understanding of the tide gate's capabilities.

The project team will better understand the community's priorities around the marsh and the ecosystem services healthy marshes can provide to help the project team set priorities for the tide gate's operations in the future.
